

JourneyMark

Effective Date: June 26, 2026

JourneyMark is provided by Tyrannosaurus Labs LLC. This Privacy Policy explains how JourneyMark handles information when you use the JourneyMark iOS app.

JourneyMark is designed for personal journey tracking, trip logging, route progress, and story building. The app is intended to keep your journey data under your control.

Information JourneyMark Stores

JourneyMark may store the following information that you create or choose to add in the app:

- Journey titles, descriptions, start and destination selections, route distance, and route progress.
- Trips, including activity method, distance, date, journal notes, and progress totals.
- Photos you attach to trip memories.
- Story highlights and generated journey summaries.
- Apple HealthKit workout data that you specifically choose to import into JourneyMark.

JourneyMark does not import your full Apple Health or Fitness history by default.

Apple HealthKit and Fitness Data

JourneyMark may request permission to read workout data from Apple HealthKit, so you can choose eligible workouts to import as trip progress.

JourneyMark only imports the HealthKit workout data you choose to use in the app. Imported workout data may include workout type, date, duration, distance, and related workout details needed to create a JourneyMark trip.

JourneyMark does not continuously read, monitor, or copy your full HealthKit history. JourneyMark does not write data back to HealthKit.

HealthKit and Fitness data are used only to help you create trips, update journey progress, and build your personal JourneyMark journey history.

JourneyMark does not use HealthKit or Fitness data for advertising, marketing, tracking, profiling, or data mining. JourneyMark does not sell or share HealthKit or Fitness data.

You can manage or revoke Health permissions at any time in the iOS Settings app.

Photos

If you attach photos to trips, JourneyMark stores copies of those photos as part of your journey memories.

JourneyMark processes attached photos to avoid storing detailed image metadata such as location and camera metadata.

JourneyMark does not access your entire photo library. You choose which photos to add through Apple's photo picker.

iCloud Sync

JourneyMark stores journey data on your device. If iCloud is enabled for JourneyMark, your JourneyMark data may sync through your private iCloud account using Apple CloudKit.

This sync is used to keep your JourneyMark data associated with your own Apple account. JourneyMark does not use iCloud sync to make your journey data public.

Location and Map Information

JourneyMark uses map and place information to help you create routes, select start and destination points, and display journey progress. Saved journeys may include place names and coordinates for route start, destination, and progress.

JourneyMark does not continuously track your live location in the background.

How JourneyMark Uses Information

JourneyMark uses your information to:

- Save and display your journeys.
- Track trip and route progress.
- Build trip journals and route stories.
- Show maps, route summaries, and progress locations.
- Import only the HealthKit workout data you choose to use as JourneyMark trip progress.
- Delete your JourneyMark data when you choose "Full Delete and Start Over."
- Restore the app back to its install state with sample data after a full reset.
- Request nearby public place information from Wikipedia/Wikimedia based on route-progress coordinates to support route stories.

Sharing and Third Parties

JourneyMark does not sell your personal information.

JourneyMark does not use third-party advertising or third-party tracking.

JourneyMark may use Apple services such as iCloud, CloudKit, HealthKit, Photos picker, and MapKit to provide app functionality. Your use of Apple services is also subject to Apple's privacy practices.

JourneyMark journey data stays in your own JourneyMark library unless you choose to share information outside the app yourself.

JourneyMark may use Wikipedia and Wikimedia services to provide nearby place facts, summaries, article links, and thumbnail images for route stories. When JourneyMark requests this content, it may send route-related coordinates or nearby place context to Wikipedia/Wikimedia, so relevant public information can be returned.

JourneyMark does not send your name, journal notes, photos, HealthKit data, or full journey library to Wikipedia or Wikimedia. Wikipedia/Wikimedia may receive standard technical information associated with network requests, such as IP address, device/browser request information, and request details, subject to the Wikimedia Foundation Privacy Policy.

Wikipedia and Wikimedia content is provided by third parties and may be subject to Wikimedia's terms, licenses, and privacy practices.

Data Deletion and Reset

JourneyMark includes a "Full Delete and Start Over" control.

Using this control permanently removes journeys, trips, attached photos, and sync state from JourneyMark so the app can return to its install state with sample data. This cannot be undone.

If iCloud sync is enabled, deletion is intended to remove JourneyMark journey data from your device and personal cloud sync.

Data Retention

JourneyMark keeps your journey data for as long as you keep it in the app. You control when to delete journeys, trips, photos, or all JourneyMark data.

Children's Privacy

JourneyMark is not intended for children under 13. JourneyMark does not knowingly collect personal information from children under 13.

Safety and Accuracy

JourneyMark is provided for personal wellness motivation, journaling, and entertainment. Logged distances, imported workouts, generated stories, route information, and map data may not always be complete or accurate.

Use your own judgment for safety, physical activity, route selection, weather, traffic, water conditions, and health decisions.

Changes to This Policy

This Privacy Policy may be updated from time to time. If changes are made, the updated policy will be posted at <https://tyrannosauruslabs.com/TyrannosaurusLabsJourneyMarkPrivacyPolicy.pdf> with a new effective date.
