

RenoReady

Effective Date: July 2, 2026

Tyrannosaurus Labs LLC designed RenoReady so project information remains under your control. RenoReady has no advertising, analytics, tracking, or third-party account system, and Tyrannosaurus Labs LLC does not sell your information.

Information RenoReady Stores

You may enter property names or descriptions, addresses, room and stair dimensions, outlines, openings, project names, materials, rates, labor amounts, costs, notes, preferences, and related renovation-planning information. Avoid entering information you do not want stored on your device or in your private iCloud account.

Camera and Augmented Reality

If you grant camera permission, RenoReady uses the live camera and Apple ARKit on your device to help capture measurements. RenoReady does not save or upload camera photos or video. Measurement points and dimensions you choose to keep become part of your project information.

You can deny or revoke camera access in iOS Settings and enter dimensions manually.

Regional Settings

On first use, RenoReady reads the device's Language & Region settings on the device to choose initial region, measurement-system, and currency preferences.

RenoReady does not request or use precise or approximate GPS location for these defaults. You can change measurement and currency preferences in the app.

Storage and iCloud Sync

RenoReady stores a local copy of your workspace on your device. When iCloud is available, it also stores and syncs your workspace through Apple CloudKit in the private database associated with your Apple Account and through iCloud key-value storage.

A randomly generated installation identifier and modification dates are stored with the workspace to support syncing.

Tyrannosaurus Labs LLC does not operate a separate RenoReady user database and cannot browse your private CloudKit records. Apple processes iCloud data under Apple's terms and privacy policy.

Silent CloudKit notifications may tell the app that synced data changed. RenoReady does not send marketing notifications.

Sharing and Use

RenoReady uses your information only to provide app features such as saving, displaying, calculating, and syncing your workspace.

The app does not share project information with advertisers, data brokers, analytics providers, or contractors.

Information may be disclosed only if you choose to export or share it in a future feature, if required by law, or if necessary to protect legal rights and safety.

Retention, Deletion, and Choices

Project information remains until you remove it.

Use **Info > Reset > Remove Entered Data and Sample Data** to clear the RenoReady workspace and sync the empty workspace to iCloud.

You can also manage RenoReady's iCloud data and camera permission through Apple's device and account settings. Deleting the app removes its local app container but may not by itself remove data already stored in iCloud.

Because Tyrannosaurus Labs LLC cannot identify or access your private CloudKit records, deletion is performed from your devices or Apple Account.

For privacy questions or help, use the support contact on RenoReady's App Store product page.

Children

RenoReady is a general-audience home-planning utility and is not directed to children under 13. Tyrannosaurus Labs LLC does not knowingly collect personal information from children.

Changes to This Policy

This Privacy Policy may be updated from time to time. If changes are made, the updated policy will be posted at <https://tyrannosauruslabs.com/TyrannosaurusLabsRenoReadyPrivacyPolicy.pdf> with a new effective date.
